

Thank you so much for visiting a Bell-net clinic. If you would like to use our free language support service, please scan the QR code on the right and directly contact a member of our team.

Our language support includes setting up appointments, providing on-site attendance / online interpretation during checkups, preparing translated material, responding to inquiries via LINE and any other follow up required to ensure that all our customers can visit our clinics with peace of mind. This service is provided completely free of charge.

Even if you do not need language support at the moment, it is a good idea to connect to us by LINE, in case you need support at a later time.

By accessing the URL or Facebook QR code below, you can find out more about the services provided at Bell-net clinics.

We wish to ensure that all of you, living here in Japan, are able to attend medical checkups with peace of mind.
