

How to care for the delicate zone

Troublesome "vaginal care"

- Monalisatouch® -

The delicate zone is a place where skin issues such as "itching" "odor" "excessive sweat" and "skin darkening" are likely to occur.

Are you concerned about any of these symptoms?

- Itching and dryness
- Odor
- Urinary incontinence , frequent urination
- Hot water leakage
(hot water leakage from the vagina when bathing)
- Pain during sexual intercourse
- Vaginal itching

Vaginal and vulva laser treatment "Monalisatouch®"

A special probe is inserted into the vagina and a carbon dioxide laser is used

The procedure is painless, so anesthesia is not required.

An anesthetic cream is applied to the vulva, but you may still feel a tingling sensation.

Improves blood flow by activating cells in the vaginal mucosa

The vaginal mucosa regenerates and the vagina becomes more hydrated, relieving any discomfort

No special care required after surgery, so easy to continue

Since hormonal drugs are not used, there is no need to worry about side effects due to medication.

Price

Vaginal & Vulva: 1st time - 29,700円 2nd and subsequent times (within 2 months) 24,200円
